

SISTERS

Systemic Innovations for a Sustainable reduction of the European food waste

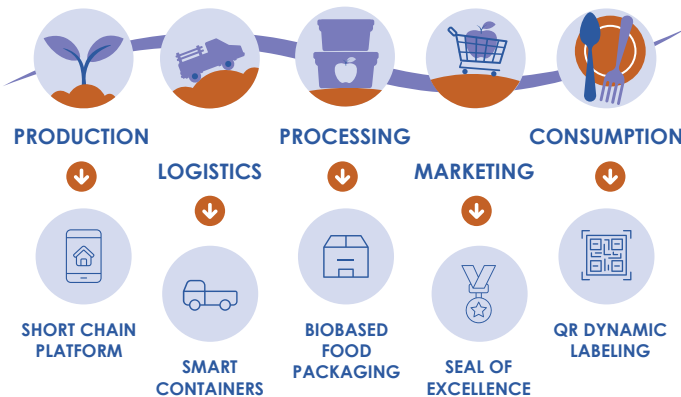

DID YOU KNOW THAT...

If food loss and waste were a country, it would be the third biggest source of greenhouse gas emissions.

Globally, roughly **33% (by weight)** of the edible parts of food produced for human consumption is lost or wasted, which is around **1.3 billion tonnes** of food loss and waste per year.

Only in the EU, we generate every year around **89 million tonnes** of food loss and waste, accounting for **20% of the total food produced**, with costs estimated at **€ 143 billion**, impacting each stage of the Food Value Chain.

The following are SISTERS proposed systemic innovations to tackle food loss & waste across the agrifood value chain:

18 partners | 3 linked third parties | 8 countries

Project coordinator- AITIIP | carolina.penalva@aitiip.com
Communication Leader - INNOVARUM | andrea.leon@innovarum.es
